

VISHWAJEET GAIKWAD

Pune, Maharashtra, India • +91-9405716310 • vishwajeetsgaikwad.01@gmail.com

Portfolio: vishwajeet-gaikwad.github.io • linkedin.com/in/vishwajeet-gaikwad • github.com/VISHWAJEET-GAIKWAD

PROFESSIONAL SUMMARY

Software Engineer and Full Stack Developer skilled in **Java 17/21+**, **Spring Boot & Microservices**, and **React.js**. Experienced in **System Design & Software Architecture**, building secure **REST APIs & End-to-End Encryption**, and orchestrating cloud workloads via **Docker & Kubernetes** and **AWS Cloud (EC2, S3, Lambda, RDS)**. Track record at Amdocs optimizing backend latency and automating **CI/CD & DevOps** pipelines. Published researcher in IRJET (Volume 12, Issue 01, January 2025) with practical expertise in **AI-Assisted Development (GitHub Copilot, ChatGPT, Claude)** and **AI/LLM Integration (APIs, RAG, Prompt Engineering, AI-powered applications)**.

TECHNICAL SKILLS

- Languages & Core:** Java (17/21+), Python, C, C++, JavaScript, SQL, Distributed Systems, OOP, Data Structures & Algorithms
- Backend & Architecture:** Spring Boot & Microservices, System Design & Software Architecture, REST APIs & End-to-End Encryption, Node.js
- Frontend & Full Stack:** React.js, Full Stack Development, Angular, HTML5, CSS3, Responsive UI
- Cloud & DevOps:** AWS Cloud (EC2, S3, Lambda, RDS), Docker & Kubernetes, CI/CD & DevOps (Jenkins, GitHub Actions), Git, Linux
- AI/LLM & ML:** AI/LLM Integration (APIs, RAG, Prompt Engineering, AI-powered applications), AI-Assisted Development (GitHub Copilot, Claude), PyTorch, TensorFlow, OpenCV, MediaPipe
- Databases:** PostgreSQL, MySQL, MongoDB

WORK EXPERIENCE

Amdocs — Software Engineer Intern

Pune, Maharashtra | Feb 2025 – Jun 2025

- Architected scalable microservices using **Java 17/21+** and **Spring Boot & Microservices**, slashing telecom usage system latency by **25%**.
- Engineered secure **REST APIs & End-to-End Encryption** across decoupled **distributed systems** to ensure fault tolerance and continuous operational uptime.
- Containerized backend modules with **Docker & Kubernetes** and integrated deployments with **AWS Cloud (EC2, S3, RDS)** for resilient cloud infrastructure.
- Integrated microservices with responsive **React.js** and Angular components for a **Full Stack Development** dashboard .
- Refactored query execution on **PostgreSQL** and **MongoDB**, decreasing execution time by **20%**.
- Accelerated release velocity by automating **CI/CD & DevOps** pipelines via Jenkins & GitHub Actions, and leveraged **AI-Assisted Development (Copilot, Claude)** alongside Python pipelines to cut manual data handling by **40%**.

KEY PROJECTS

AI-Driven Workout Assistant (AI-Powered Application) | *Python, OpenCV, MediaPipe, AWS EC2*

Jan 2025

Published research paper in IRJET (Volume 12, Issue 01, January 2025)

- Designed an AI-powered computer vision application tracking 33 anatomical keypoints in real time via live video stream inference.
- Implemented geometric joint-angle analysis (elbow, knee, hip) to evaluate posture correctness, detect anomalies, and output instant audio-visual corrective feedback.
- Containerized and deployed the inference pipeline on **AWS Cloud (EC2)**, achieving steady 30+ FPS feedback loops with minimal compute latency.
- Published peer-reviewed research in IRJET (Volume 12, Issue 01, January 2025), demonstrating practical AI application in fitness.

Sign Vision – AI Sign Language Interpreter | *Python, PyTorch, React.js, Deep Learning, REST APIs*

2024 – 2025

- Engineered an end-to-end **Full Stack Development** accessibility platform translating dynamic hand gestures into structured text and synthesized speech.
- Trained and fine-tuned deep learning models on diverse sign datasets, improving bounding box stability and gesture classification accuracy.
- Utilized **AI/LLM Integration & Prompt Engineering** via API pipelines to translate isolated sign glosses into coherent, natural conversational sentences.
- Built high-throughput **REST APIs** connecting the deep learning inference service to a responsive **React.js** frontend with low latency.

EDUCATION

Master of Technology (M.Tech) in Computer Engineering	Modern College of Engineering, Pune (Pursuing)	2025 – 2027
Bachelor of Technology (B.Tech) in Computer Science & Eng.	SVERI's College of Engineering, Pandharpur (CGPA: 7.87)	2021 – 2025
Higher Secondary Certificate (HSC) – Class XII	K.N. Bhise College, Kurduwadi (87.00%)	2021
Secondary School Certificate (SSC) – Class X	New English School, Ridhore (75.20%)	2019
